

People Are Talking About Hearing Life Come Alive

SPORTEAR OFFERS HEARING ENHANCEMENT AND PROTECTION IN ONE—VIRTUALLY INVISIBLE—DEVICE

Imagine being able to hear conversation and other sounds clearly while your hearing is protected from muzzle blast and other loud noises. SportEAR brings 100% digital technology to the tournament as the Shoot-Out sponsor.

HERE'S WHAT PEOPLE ARE SAYING.

Joe Sturdy uses it target shooting. "I'm always shooting at my club's target range and was always hard-pressed to hear what others were saying to me while wearing earmuffs. But since I got my SportEARs, I can hear every conversation while protecting my hearing at the same time. Now everyone is wearing them!"

THE SPORTEAR DEVICE IS ALSO EFFECTIVE WHILE HUNTING.

"After one pheasant hunting trip with SportEAR, I'll never leave it home. When I let my friends try it, they all went out

and got SportEARs," said Ted Cameron.

Ryan Payne agrees, "The best thing about SportEAR is that I can hear everything around me, even whispered conversations

between my fellow hunters—but as soon as the shooting starts, my hearing is instantly protected. I don't know how SportEAR does it, but this technology is simply incredible. I highly recommend it to any serious sportsman."

THE DEVICES EVEN OFFER PROTECTION

AROUND LOUD MACHINERY.

"I first bought a SportEAR for hunting and was so surprised at its sensitivity and protection that I bought a second one and now wear them to work at the plant," says Brad Mackerell.
